

1. I listen to K-LOVE at home, in my car, and at work. It is what keeps my life focused on what's important: GOD
2. I believe the effect on our community would be very negative if we no longer had K-LOVE as it not only helps adults stay focused, it also helps our teenagers who so desperately need to be focused on positive influence rather than the negative.
3. I believe the impact on public interest is immeasurable. There is so much negative input in our society as a whole, that listening to K-LOVE is like a breath of fresh air; a moment of quiet solitude; an opportunity to hear something good, wholesome and uplifting.
